

LITTLE TREASURE HUNTERS

MAKE YOUR OWN SCAVENGER HUNT!

Get ready by finding...

TONED PAPER + DRAWING MATERIALS

- *Any paper that is a little brown, tan, or orange*
- *Any drawing materials you wish, although I recommend markers!*

01 First, you'll need to hide the treasure.

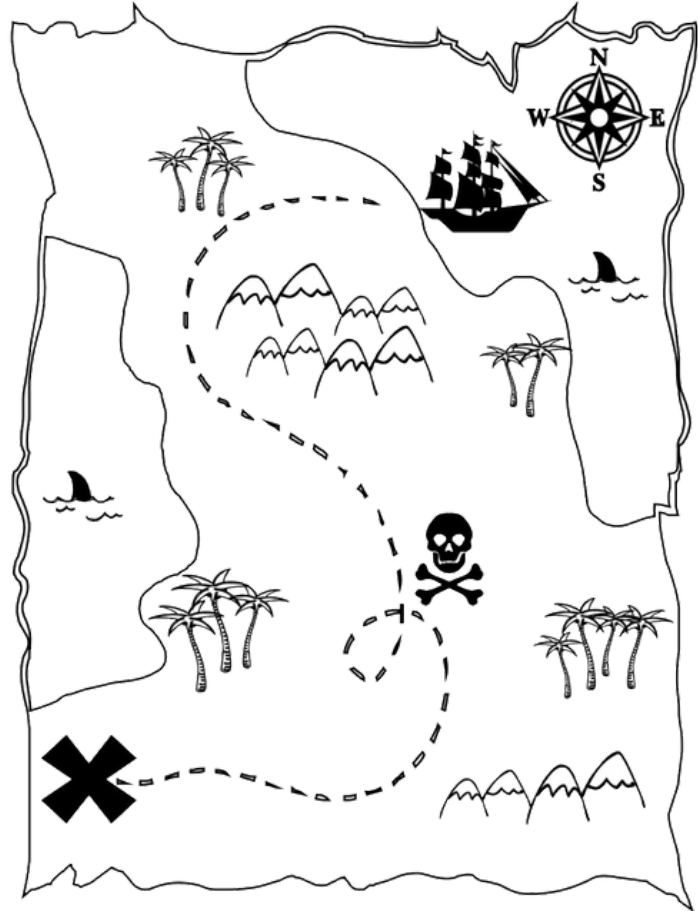

Maybe your favorite game or a stuffed animal.

02 Draw a detailed map.

Using your supplies, draw a detailed map with an X marking the secret spot where your treasure is hidden.

03 Give the map to your family.

See if they can find the hidden treasure!

Have you ever thought about being an inventor?

That's what **product designers** get to do! They come up with objects that people can use including toys, and they also come up with cool new ideas for things that already exist.

Another cool job that involves creative thinking is **game design**. You just became a game designer by creating this treasure map! They have duties like designing characters, levels, puzzles, art and animation. They may also write code, using various computer programming languages. CodeVA right here in Richmond runs all kinds of really fun coding programs for K-12!

Show us what you made! Post and tag your work on Instagram!
